

Maths

Place Value

We will be learning about the place value of numbers up to 100. We will be partitioning numbers into tens and ones and exploring how numbers are made. We will use our knowledge to order and compare numbers. We will also be counting in steps of 2, 5, 10 and 3.

Addition and Subtraction

We will be learning number bonds to 10 and 100 and exploring how we can use our knowledge to make fact families and apply related facts to problem solving. We will then move onto adding and subtracting, starting with 1-digit numbers, and progressing to 2-digit numbers.

Shape, Space and Measure

Every Monday our maths lessons will be based on shape, space, and measures. This half term we are learning about geometry. We will be exploring 2D and 3D shapes. We will be learning their all about their properties and how we can use this information to identify and group different shapes.

Autumn

Overview

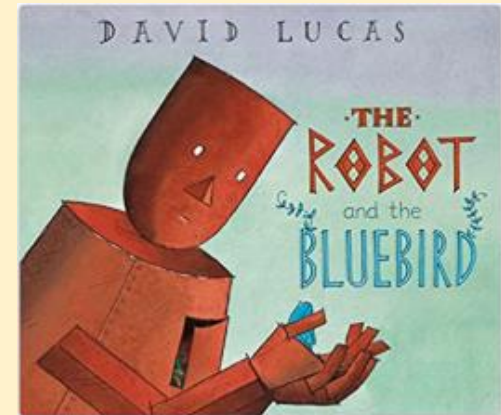

Maths

and

Writing

Writing

In English we will be using the beautiful picture book 'The Robot and the Bluebird' to inspire our writing. We will consider how the illustrations can deepen and enrich the meaning of a text, and we will explore the themes of the text and the development of the characters.

We will use the story to debate situations, explore alternative perspectives and write letters and instructions. Through the varied writing opportunities, we will be concentrating on using capital letters and full stops in all of our sentences, and continuing to work on correct spellings and letter formation.

This story is a favourite of mine and I'm sure
