

Maths

Place Value

We will be learning about the place value of numbers beyond 100. This will involve using base 10, number lines and part whole models. We will be ordering and comparing numbers.

Addition and Subtraction

We will be learning to use the column method for addition and subtraction as well as learning to cross the 10s boundary. We will recap our number bonds to 10 to help us with this.

Multiplication and Division

We will be using arrays, sharing, and grouping to learn how to multiply and divide numbers accurately.

Shape, Space and Measure

Every Monday our maths lessons will be based on shape, space and measures. This half term we are learning about money.

We are learning to count amounts of money using both coins and notes as well as calculating change.

Year 3

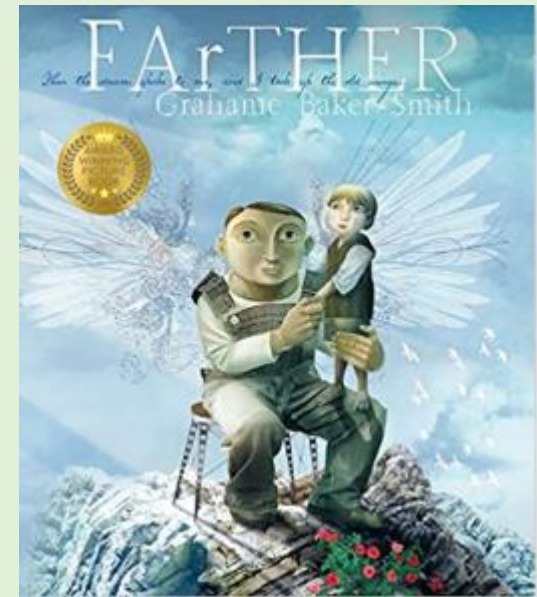

Autumn

Overview

Writing

We will be using the wordless book FArTHER to inspire our creative writing. We will be using the powerful images to write diary entries, dream sequences and a sequel to the book.

Maths

And

Writing

We will continue to learn to use punctuation correctly as well as this; we will be using noun phrases to make our writing descriptive.
