

# Year 1 Spring Term Science

## Key Vocabulary

leaf: one of the usually green, flat parts of a plant or tree that grows from the stem or branch.

flower: the part of a plant that has petals and that makes fruit or seeds

blossom: the flower of a plant which forms a seed or fruit

petals: one of the separate leaves that form the outer part of a flower head

fruit: the part of a plant that has seeds and flesh

roots: the part of a plant that usually grows underground.

seed: the small part of a flowering plant that grows into a new plant

branch: a woody part of a tree or bush that grows out from the trunk

trunk: the main stem of a tree.

stem: the main part of a plant that grows up from the ground and supports the branches, leaves, flowers, or fruits that may grow from the plant.

## Science

To start the term we will be looking at the season of 'Winter' and comparing what the weather and area around us is like, compared to 'Autumn'.

This term we will be learning about 'plants'.

We will be looking at a variety of plants and learning how to describe them based on their characteristics. We will also be learning the names of different wild and garden plants that we can find in our local area. As part of our learning, we will be taking part in some planting and finding out about what plants we can eat and what plants need to grow.

Our enquiries will be:

What plants can I grow at home/school/in a particular object/indoors/outside?

Do all flowers have the same number of petals?

## Wild Plants

## Garden Plants

Through the love of God, we protect our school community. Together we trust, hope, persevere and flourish on life's great adventure
