

Why is it important to learn computing?

- To learn how the technology around us like the Internet works.
- To use knowledge of how things work to program both on screen and off screen to solve problems.
- To become digitally literate and be able to express ourselves through information and communication technology, in a respectful and responsible manner.
- To learn how to be safe online through E-safety lessons, so we can be ready for the future workplace and become active participants in the digital world.

Successful Digital Citizen
